

Project Initialization and Planning Phase

Date	02 July 2026
Team ID	CCAP-01
Project Name	Credit Card Approval Prediction
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

I am	I'm trying to	But	Because	Which makes me feel
Credit card applicant	Get approved quickly and fairly	I have a limited or non-traditional credit history	The system can't see my regular income and repayment behavior	Uncertain about whether I'll be approved

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A young salaried professional applying for a credit card.	Get quick approval for a new credit card.	I have a short credit history with the bank.	I have stable income and no existing debt.	Anxious about rejection due to limited credit history.
PS-2	A self-employed applicant with irregular monthly income.	Secure a credit card despite variable income.	I don't have traditional fixed salary slips.	I have consistent repayment history on past credit accounts.	Uncertain whether the model will assess me fairly.
PS-3	A bank credit risk analyst reviewing applications.	Quickly screen a large volume of applications for approval risk.	Manually reviewing every application takes too much time.	I need a reliable model to flag high-risk applicants early.	Overwhelmed by manual review, hopeful automation will help.
