Project Name	Credit Card Approval Prediction
Maximum Marks	2 Marks

Customer Journey Map

Map out the customer's experience stage-by-stage, capturing their actions, touchpoints, thoughts, and feelings, along with process ownership and improvement opportunities at each stage, for the Credit Card Approval Prediction system.

Phase of Journey	Stage 1: Apply	Stage 2: Predict & Review	Stage 3: Decide & Follow-up
Actions <i>What does the customer do?</i>	- Enters personal and financial details in the web form - Uploads a batch CSV for multiple applicants - Submits the application for processing	- Views the instant Approved/Rejected prediction - Checks prediction history and score - Reviews model info and feature reference pages	- Downloads the prediction report as PDF or Excel - Cross-checks result with credit policy - Receives the final decision communication
Touchpoint <i>What part of the service do they interact with?</i>	- Flask single-applicant prediction form - Batch CSV upload page - Login / signup page	- Prediction results page - Prediction history dashboard - Model info & feature reference pages	- PDF / Excel download feature - Internal credit approval workflow - Email or branch communication
Customer Thought <i>What is the customer thinking?</i>	"I hope I entered all the details correctly." "Will this take long to process?" "Is my data secure with this app?"	"Is this score reliable and fair?" "What factors influenced this prediction?" "Should I trust this over manual judgement?"	"Is this the final decision, or does it need approval?" "I want a record I can refer back to." "I hope this speeds up future applications too."
Customer Feeling <i>What is the customer feeling?</i>	Hopeful but slightly nervous about sharing financial details	Curious and cautiously confident once the prediction appears	Relieved and satisfied once a clear, documented decision is reached
Process Ownership <i>Who is in the lead on this?</i>	Applicant / Front-end Flask web app	ML model & backend (predict.py, preprocessing.py) / Bank credit analyst	Bank credit analyst / Approval authority

Phase of Journey	Stage 1: Apply	Stage 2: Predict & Review	Stage 3: Decide & Follow-up
Opportunities <i>How can we improve this stage?</i>	● Add draft auto-save for long forms ● Improve input validation messages ● Support multiple languages	● Add SHAP-based explainability visuals ● Show prediction confidence range ● Add a batch-processing progress indicator	● Send automated email notifications ● Enable e-signature for final approval ● Add an audit trail for compliance
